

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1           **Claim 1** (currently amended) ~~The~~ A telephone terminal  
2       device comprising:  
3           a temporary storage memory for temporarily storing an  
4       inputted telephone number; and  
5           a plurality of telephone directories including a  
6       plurality of user selectable directories for storing user  
7       selected phone numbers, each of the telephone directories  
8       associated with at least one telephone directory memory, each  
9       of the telephone directory memories storing input telephone  
10      numbers;  
11          wherein a telephone number stored in the temporary  
12      storage memory is registered in at least one telephone  
13      directory memory associated with one of said user selectable  
14      directories selected from the plurality of telephone  
15      directories after making a call.

1           **Claim 2** (original) A telephone terminal device as claimed  
2       in claim 1, wherein name and information related to the  
3       telephone number registered are added thereto.

1           **Claim 3** (original) A telephone terminal device as claimed  
2       in claim 1, wherein data of at least one of the telephone

3        directories are erased automatically after passage of a  
4        predetermined time.

1            **Claim 4** (previously presented) A telephone terminal  
2        device as claimed in claim 1, further comprising:

3            a transmitted telephone number record directory memory  
4        for storing a plurality of telephone numbers called; and

5            a buffer directory memory, whose data are erased  
6        automatically after passage of a predetermined time;

7            wherein telephone numbers are registered in the  
8        transmitted telephone number record directory memory in the  
9        order of call, and in the case the number of the telephone  
10       numbers to be registered exceeds the number capable of being  
11       stored in the transmitted telephone number record directory  
12       memory, the telephone number of the oldest registration order  
13       or a telephone number specified by the user is displaced from  
14       the transmitted telephone number record directory memory to  
15       the buffer directory memory for reregistration.

1            **Claim 5** (previously presented) A telephone terminal  
2        device as claimed in any of claims 1 to 4, further comprising  
3        an interface means for connection with an external memory  
4        device external to said terminal device.

1            **Claim 6** (previously presented) A telephone terminal  
2        device as claimed in claim 5, wherein at least one of the

3 telephone directory memories comprises the external memory  
4 device connected with a telephone terminal device main body  
5 via the interface means.

1 **Claim 7** (previously presented) A telephone terminal  
2 device as claimed in any of claims 1 to 4, wherein the  
3 telephone directory memory for registering the telephone  
4 number stored in the temporary storage memory after a call is  
5 selected manually from one of the plurality of the telephone  
6 directory memories associated with the user selectable  
7 directories.

1 **Claim 8** (previously presented) A telephone terminal  
2 device as claimed in any of claims 1 to 4, wherein the  
3 telephone directory memory for registering the telephone  
4 number stored in the temporary storage memory after a call is  
5 selected preliminarily from one of the plurality of telephone  
6 directory memories associated with the user selectable  
7 directories so that the telephone number stored in the  
8 temporary storage memory is registered automatically in the  
9 preliminarily selected telephone directory memory after each  
call.

1 **Claim 9** (new) A telephone terminal device comprising:  
2 a temporary storage memory for temporarily storing an  
3 inputted telephone number; and

4           a plurality of telephone directories including a  
5           plurality of user selectable directories for storing user  
6           selected phone numbers, each of the telephone directories  
7           associated with at least one telephone directory memory, each  
8           of the telephone directory memories storing input telephone  
9           numbers;

10          wherein a telephone number stored in the temporary  
11          storage memory is registered in at least one telephone  
12          directory memory associated with one of said user selectable  
13          directories selected from the plurality of telephone  
14          directories after making a call, said selecting including the  
15          user selecting one of said plurality of directories from a  
16          list of directories automatically provided to the user on the  
17          display after ending the call.
